## WellDyneRx, Inc. Implements ePostRx™ Pharmacy Management System for Dispensing Prescriptions

WARMINSTER, Pa.--([BUSINESS WIRE](#))-- AdvanceNet Health Solutions (ANSHealth), announced today that WellDyneRx, Inc., has successfully completed data migration and begun dispensing prescriptions using ePostRx™ as its primary pharmacy management and fulfillment solution. The ePostRx™ Open Source Solution was adopted by WellDyneRx and integrated with its other proprietary software to accommodate all prescription distribution models, including Mail and Specialty Pharmacy, on a single platform across multiple dispensing locations.

"After reviewing various options, we selected ePostRx™," said Susan Cain, COO, WellDyneRx. "ePostRx™ allows us to fully customize the software to meet our specific business needs and workflow requirements. This customization gives us a competitive advantage in the marketplace, as we can provide our clients and members an elevated level of service and higher quality fulfillment through streamlined operations. With ePostRx™, we are also able to better control our expenses, which ensures we can continue to provide our services at reasonable costs."

From ANSHealth, Matt Walko - VP of Business/Software Development, shared his thoughts on WellDyneRx selecting ePostRx™ as its open source pharmacy solution. "We've proven ePostRx™ provides pharmacy owners a much lower cost per script, as well as lower error rates, while increasing operational efficiencies and member satisfaction. WellDyneRx has made a strong commitment to the growth and success of their business by taking advantage of the inherent flexibility ePostRx™ offers, versus other more costly proprietary options in the industry today. We look forward to a very long and rewarding relationship with our partners at WellDyneRx."

### About AdvanceNet Health Solutions, Inc.

Established in March 2001, AdvanceNet Health Solutions (ANSHealth) has a track record of highly successful research, development and application of open technologies that target the ever evolving pharmacy industry. The ePostRx™ solution suite assists pharmacies in managing their operations more efficiently to respond to such market challenges as the pharmacist shortage, evolving electronic prescribing, the need for highly customized business workflows, skyrocketing prescription volumes and shrinking margins. ePostRx™ solutions support all facets of pharmacy operations, including Retail Chain, Mail-Order, Specialty, Central Fill, Long Term Care, and Veterinary business models.
