

# PHARMACY SOFTWARE NOW **OPEN** FOR BUSINESS

YES...WE ARE  
**OPEN**

## ANS Health

is proud to offer it's full featured pharmacy management system, ePostRx, as a FREE download to anyone who is interested in using the product to run their mail order, chain, central fill or long term care pharmacy. This unique business model gives clients the control over one of their most important business components, IT infrastructure. Traditionally pharmacies have been at the mercy of the technology vendor for custom workflow programming, interface programming and reporting. The open source model allows you to control your business. When it comes to customizing the application to fit your business model, now you have a choice:

**1** Clients have the option to do the custom programming

**2** ANS will train your staff to do the work

**3** ANS will do the work on a time and materials quote

**AdvanceNet**  
HEALTH SOLUTIONS, INC.

**epostRx**<sup>tm</sup>

Take back control. Visit [www.anshealth.com](http://www.anshealth.com) today to become part of the fast growing community.
