About ePostRx Enterprise Fill

ePostRx Enterprise Fill™ offers the industry's only single source, browser based, multi-tiered network solution that can support all your electronic SCRIPT, Prescription Management and Rx Dispensing requirements across any pharmacy resource. ePostRx Enterprise Fill™ automates the prescription-fulfillment process, from Order/Rx/OTC receipt and insurance adjudication, to DUR and dispensing for all pharmacy business models, including retail chains and high-volume pharmacies operated by insurers, integrated health systems, supermarkets, wholesalers, mail order service or specialty mail facilities. ePostRx Enterprise Fill™ is designed to maximize efficiency across any pharmacy's resource resulting in increased profits!

Here's how ePostRx Enterprise Fill differs from other Pharmacy Systems:

| <i>System Features</i> |
|---|
| <ul style="list-style-type: none"> • No prescription transaction fees. |
| <ul style="list-style-type: none"> • Single Source solution that supports retail, mail, electronic prescriptions and central fill business workflows. |
| <ul style="list-style-type: none"> • Developed using Java and distributed web technologies. Runs on any platform that supports the JVM (Java Virtual Machine) such as Windows, Solaris, Linux etc. |
| <ul style="list-style-type: none"> • Centralized database drives data consistency across the enterprise while allowing online access to real-time data. Can support multiple pharmacies servicing multiple facilities. |
| <ul style="list-style-type: none"> • Intuitive Graphical User Interface (GUI) that utilizes both keyboard and mouse driven selections. |
| <ul style="list-style-type: none"> • Group and User Level defined roles limit user access to sensitive functional areas. Allows creation of user groups to target specific business needs. |
| <ul style="list-style-type: none"> • <i>And many, many more...</i> |
| <i>Pharmacy Features</i> |
| <ul style="list-style-type: none"> • Electronic workflow queues. Events are automatically routed from queue to queue. |
| <ul style="list-style-type: none"> • Supports manual and automatic fulfillment, imaging, pill images, IVR and Doctor Fax. |
| <ul style="list-style-type: none"> • Clinical Screening including Drug/ Drug, Drug/ Food, Drug/Alcohol, prior adverse reaction, duplicate therapy, and drug/disease contraindication screening. |
| <ul style="list-style-type: none"> • Use of bar code technology speeds data entry process and assures quality during the dispensing and verification operations. |
| <ul style="list-style-type: none"> • Multiple notes for Rx, Doctor, Supplier, Product, Inventory, Patient etc.. |
| <ul style="list-style-type: none"> • Fast and easy prescription entry and filling process. |
| <ul style="list-style-type: none"> • Real-time electronic claims adjudication utilizing version 5.1 telecom standard. |
| <ul style="list-style-type: none"> • <i>And many, many more...</i> |
